

# THE LONG-TERM VALUE OF LOW-FLOW

Low-flow T&S products such as spray valves, aerators, metering cartridges and electronic sensor faucets can yield particularly large savings for years to come – all for a relatively small upfront investment.

## Did you know?

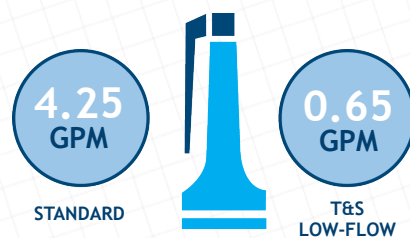

Low-flow products perform equally as well as higher-flow alternatives

Aerators can save facilities tens of thousands of gallons per year, per installation:

3,504 gallons saved annually  
17,520 5-year savings per installation \*

\* 3 employees/day. 8 handwashes/employees/day.  
365 operating days per year. 20 seconds per handwash.

236,520 gallons saved annually  
1,182,600 5-year savings per installation \*

\* 3 operating hours a day. 365 operating days per year.

Low-flow pre-rinse spray valves can save more than a million gallons per year, per installation:

## ELECTRONIC SENSOR FAUCETS

SAVE  
1.0 G  
PER HANDWASH

## METERING CARTRIDGES

20%  
LESS WATER  
PER HANDWASH
