

T&S Family of Spray Valves

- ▶ As the undisputed leader in spray valves, T&S Brass has set the industry standard for more than 60 years. Today, we manufacture faucets, fittings, specialty products and accessories for foodservice, industrial, commercial plumbing and laboratory markets. Throughout the years, we've stayed in step with our customers' needs and introduced a number of plumbing innovations, including the market's first pre-rinse unit.

We understand that your situation is unique. That's why, at T&S Brass, we've engineered the industry's most extensive product line of spray valves to meet your particular need. Now, you no longer have to choose a one-size-fits-all spray valve, but you can match your specific application needs with the ideal solution. Plus, we have seven different options for foodservice applications — all with the reliability you've come to expect from T&S.

Choosing the Best Solution

But how do you make the right choice? First, decide the nature of what needs to be cleaned; next, identify who will be using the spray valve; and, finally, determine your other goals, such as user-friendliness or sustainability. Each of our spray valves is designed to match your specific needs, from low-flow to ergonomics to high-power performance.
