

Shower Valves

New Models! B-3400 and B-3500 Series Give You More Options

When you choose a T&S Brass product, you know you've chosen one with *Reliability Built In™*.

Our *Pressure Balancing Shower Valve* models include various combinations of shower products to meet your specific needs.

	2.5 GPM	1.5 GPM
1/2" NPT Sweat Connections	B-3200 Series	B-3400 Series
1/2" NPT Threaded Connections	B-3300 Series	B-3500 Series

B-3200 and B-3400 Series with Sweat Connections

Our B-3200 and NEW B-3400 series shower valve packages are designed for installation with 1/2" sweat connections, allowing for easy sweating of copper pipe.

B-3200/
B-3300
Shower
Head

The B-3200 series includes a shower head with 2.5 GPM. Our NEW B-3400 series gives you a choice of models with a water-saving 1.5 GPM shower head.

B-3300 and B-3500 Series with Threaded Connections

The B-3300 and NEW B-3500 series models have 1/2" NPT threaded connections for easy installation to traditional threaded pipe, especially designed for installation in facilities that prohibit open flames (i.e. health care facilities).

The B-3300 series includes a 2.5 GPM shower head, and the NEW B-3500 series offers a water-saving shower head with a flow rate of 1.5 GPM.

With many different component packages to choose from, these shower products all include a heavy-duty solid brass pressure balancing shower mixing valve.

And with T&S's *Reliability Built In™*, you can be assured of owning an outstanding shower product with T&S established quality and durability.

B-3200/B-3300 Pressure Balancing Shower Valve, 2.5 GPM Shower Head and Tub Spout

FEATURES:

- Temperature limit stop
- Integral supply stops
- Replaceable ceramic cartridge
- Shower valve with heavy-duty solid brass construction (ASSE 1016)
- Polished chrome trim with color coded index
- Choice of 1.5 GPM or 2.5 GPM shower head models
- Chrome plated tub spout

OPTIONS:

- Hand held spray assembly with throttle down feature saves water
- Flexible 5 ft. polished metal hose
- Slide bar with multi-positional bracket
- Optional wall-mount vacuum breaker on spray assembly
- A wide variety of different shower model packages to choose from

FEATURES and BENEFITS

- The *pressure balancing valve* (ASSE 1016 listed) prevents scalding and thermal shock and maintains the desired water temperature, even with fluctuations in water pressure
- *Integral supply stops* allow for easy maintenance of the cartridge without shutting off the water main or disrupting the water supply of other fixtures
- The *ceramic cartridge* is easy to maintain or replace, and the B-3200/ B-3300 models have a built-in feature that allows for back to back installations
- Its *solid brass construction* means this shower valve is robust and long lasting

- A *polished chrome plated metal trim* with color coded *index* makes it an attractive, easy to clean and simple to use unit
- *Two choices of shower head: 1.5 GPM* (B-3400 and B-3500 series) or *2.5 GPM* (B-3200 and B-3300 series). Includes polished chrome shower head with ball joint, arm and flange assembly
 - An *optional hand held spray assembly* (B-3200 and B-3300 series) has a throttle down feature to conserve water, and the hand spray maintains the desired water temperature when re-activated
 - The *5 ft. flexible polished metal hose* is corrosion-resistant, non-yellowing, easy to clean and long enough to provide the user with 360° rotation of the spray
 - An *optional slide bar with the variable position bracket* allows the user to position the hand held spray at different heights and angles to accommodate personal preference
 - An *optional in-line vacuum breaker* in the flexible hose assembly prevents back flow and water contamination
 - The *chrome plated tub spout* with a diverter lift knob is built to last
 - A *wide variety of different shower model packages* are available to customize your application
